There are many other features available on the Mahoning County GIS website – too many to go into detail in this document. However, two other features are important. And a third may be of interest to you.

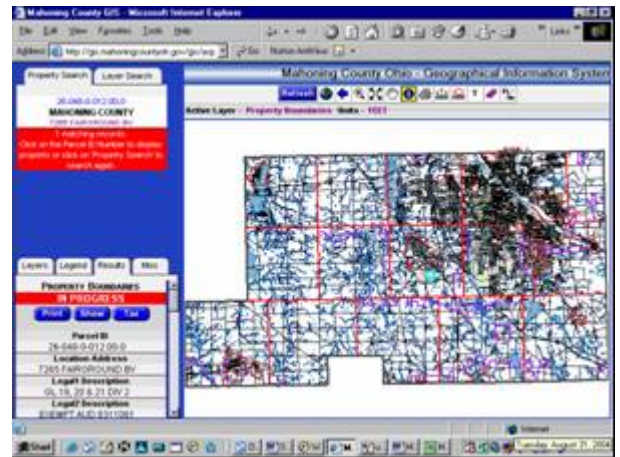

Layers –

The layers tab in the bottom left corner of the screen enables you to turn specific map layers on or off for the map you are generating. As an example by scrolling down the list of layers and selecting Road Centerlines and Waterways (by clicking in the box to the left of these layer names), then clicking on the Refresh button - **Refresh** - the previous map now looks like the map in the photo on the right:

Searches –

A search for a specific property can be performed by clicking on the Property Search tab in the upper left corner, then entering data in either the Parcel Number, Owner Name, or Address fields, and then clicking on the Search button - **Search**. The result of the search performed by entering 7265 FAIRGROUND BV in the address field is shown in the photo on the right.

The Tax Information Link –

After you have found your property, you can click on the Tax button - **Tax** - in the lower left corner. This will launch a link to the Mahoning County Auditor website, with tax information about your property. The result for 7265 FAIRGROUND BV is shown in the photo on the right.
